DETAILED ACTION

Allowable Subject Matter

1: Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art teaches the method of background replacements wherein a classification for each pixels in an image is performed to classify each pixel as a foreground or background image. However, the prior art does not teach that the classification results from calculating a probability function directly from a formula using chromatic component values and intensity values for each pixel producing a classification and probability map simultaneously.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
